establishments in Austria This invention relates to a method of monitoring the operating condition of a vehicle by sensing the heat signature emanating from the body of the vehicle and is primarily applicable to a manually operated vehicle such as a bicycle, where access to the vehicle body is limited. The invention may be used to monitor the operating condition of the vehicle and at the same time may be used to protect the vehicle from damage in the event of an emergency. Sensors are well known in the art and may be used to sense the presence of objects and other features of the environment 2d92ce491b
