Find Balance Sheet records at any time Add new, edit or delete Balance Sheet records at any time Quickly get QuickBooks balance sheet balances Download Balance Sheet Show associated payroll records Display or hide balances according to changes Create new balances from a custom or predefined formula Display balances and total journal entries Filter to and from records Count and sum records and totals Enter and exit balances Sort balances by date and location If you are not ready to enter your real financial data, but you prefer to keep track of it, then you can give Excel Add-In for QuickBooks a try. It is a tool that is very easy to use and can help you monitor your finances better and provide a financial overview of your company. Connecting to QuickBooks can be quite a difficult process, especially if you are a new user. However, there are several things you should know

---

about connecting to QuickBooks. If you want to be able to access your QuickBooks data from the web, then you need to be able to set up a connection with the QuickBooks server. You should know that QuickBooks has two servers that you can connect to. One of them is the Online Server, which is what you would normally use if you have a business on the web. The second one is the Desktop Server, which is what you would use if you prefer to access your data locally, but you are away from your desktop. To connect to the desktop server, you will need to perform a few steps. You should know that the process to connect to the Desktop server is the same process you use when you connect to the Online server. The only difference is that you need to enter a different URL on the connection properties window, which can be found on the main window. Learn how to set up a connection between your website and QuickBooks. The steps to connect to the Desktop server are pretty simple. You need to make sure that

---

you have installed the proper QuickBooks file onto your local machine. Then, you need to make sure that you have configured the URL. You can learn how to do this from our tutorial. What are some problems that you may encounter when connecting to QuickBooks? If you have your files saved on a remote server, then you need to make sure that the files are accessible through the IP address. You can learn how to do this from our tutorial. The main things you should know when connecting to QuickBooks are that you can connect to the Desktop
